

(A) Tumbleweed-RecoveryBench

rank true SELEX winners above composition-matched random
in-domain: the target family is in training

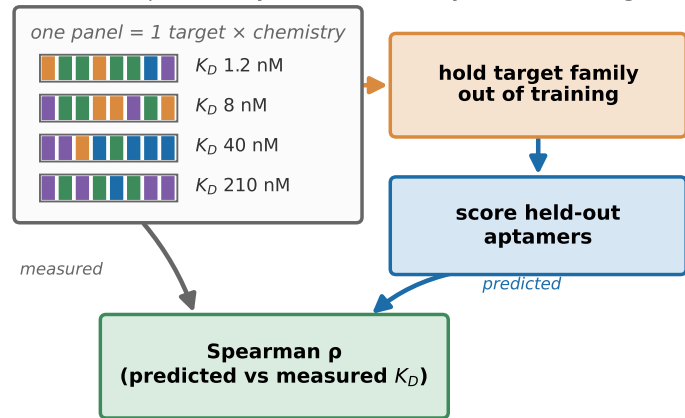

5 SELEX targets: FGF9 · IL1RL1 · PARP1 · MECP2 · SNCA

400 winner / 400 naive / 400 random per target

(B) Tumbleweed-KdBench

rank held-out aptamers by measured affinity (leave-one-target-out)

aggregate ρ over 47 leave-one-target-out panels

911 measured aptamers (653 DNA / 258 RNA)
